

VI PHA CO

More than protection

GOWN

Vi Pha Co provides unique infection protection clothing for both patients and staff. When freedom of movement is crucial to a successful operation our gowns are specifically designed to offer the highest level of protection and comfort.

All our disposable clothes match the requirement from ISO 13485:2003 and CE marking 93/42/EEC for the manufacture of sterile disposable gowns for patients and medical staff to prevent the transmission of infective agents during surgical procedures.

Our AAMI level 3 fabrics are efficient barrier against fluids including alcohol, microbial penetration while remaining breathable. Seeking high level of quality and safety, we provide gowns for all type of operation from minimal invasive clean to wet surgery with breathable reinforced front and impermeable sleeves and joints.

At Vi Pha co, we support the hospitals to make the most of their budget with a large range of clothing combining various protection level, comfort while offering competitive costs.

Standard gown

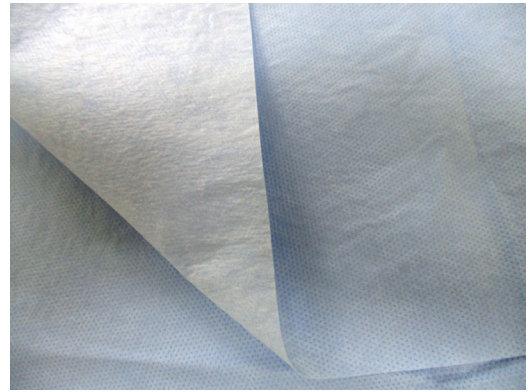

references G200X
