

VI PHA CO

More than protection

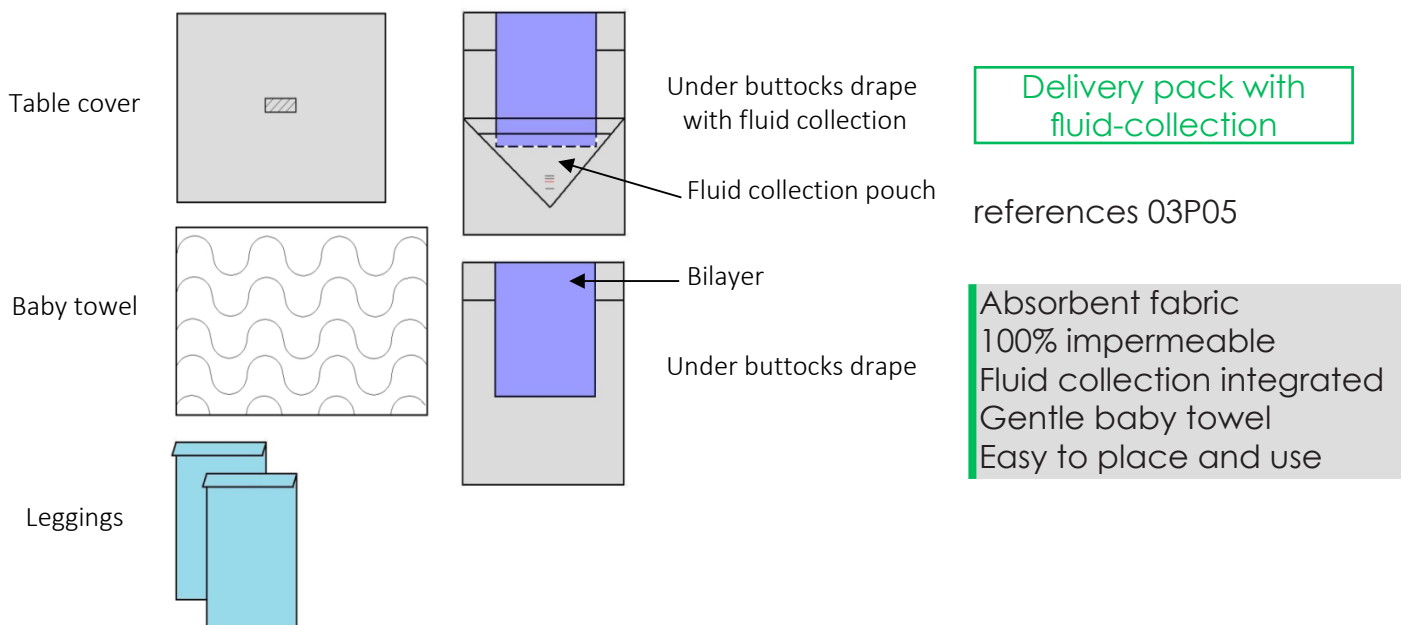

OBSTETRICS

Obstetrics is related to the care of women and babies during pregnancy, childbirth and the post-delivery periods. Surgeries related to obstetrics are natural delivery, cesarean section and pre-natal delivery. Vi Pha Co provides drapes specific to each procedure with high level fluid collection and efficient infection control for the well-being of both mother and child.

Vi Pha Co drapes are easy-to-use, quick to install thanks to their smart folding and instruction labels in order to achieve safety and infection control. Our designs dedicated to birth integrate features such as tube holders, incise films, pouches, leggings, apertures and more.

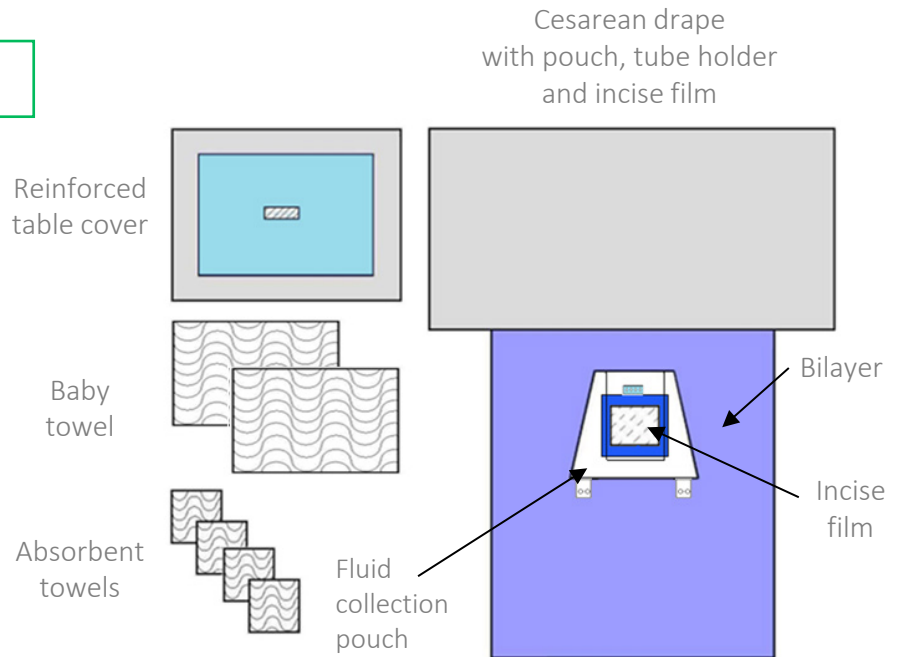

Our drapes are design to limit the surgery area around the incision to reduce the exposure risk. Made from sterilized AAMI level 3 fabrics with special reinforcement, absorbent material, Vi Pha Co drapes provide safety, efficient fluid control, breathability and overall drape stretching resistance.
